COMMENTS OF **BELGIUM** to the
ISSUES PAPER No. 10

1. We would like to add:
"R&D effort will continue to be necessary throughout the lifecycle of radioactive waste management in order to ensure optimization of management routes in general and of disposal solutions in particular as well as to comply with the nuclear waste directive obligations."
2. The date of the first operational storage should be 2025 as mentioned officially via IGDTP (instead of 2030)
3. On page 8-9 acquis communautaire we would like to add article 103 EURATOM: https://ec.europa.eu/energy/sites/ener/files/documents/1_EN_ACT_part1_v6_1.pdf
