

Agreed strategic targets in Solar thermal electricity

1. Short-term: > 40% cost reduction by 2020 (from 2013) translating into
 - Supply price* < 10 c€/kWh for a radiation of 2050 kWh/m²/year (conditions in Southern Europe)
2. Longer-term: develop the next generation of CSP/STE technology
 - New cycles (including supercritical ones) with a first demonstrator by 2020, with the aim to achieve additional cost reductions and opening new business opportunities
