

COGEN Europe welcomes the Issues Paper on bioenergy and renewable fuels needed for sustainable transport solutions in the context of an Initiative for Global Leadership in Bioenergy. More specifically we believe that the barriers addressed for the use of bioenergy in stationary applications are well addressed and that the overall system targets are appropriate. We agree that there is room for improvement in the efficiency of biomass plants to make them more competitive, while reduce conversion costs.

Welcome thus the strategic targets #1 and #3, which we consider appropriate.

We are looking forward to working with the SET-Plan Secretariat and Commission in the upcoming stages of this process.
