

Agreed Strategic Targets for offshore wind energy

1. Reduce the levelised cost of energy (LCoE) at final investment decision (FID) for fixed offshore wind* by improvement of the performances of the entire value chain to:

- o less than 10 ct€/kWh by 2020, and to
- o less than 7ct€/kWh by 2030

2. Develop cost competitive integrated wind energy systems including substructures which can be used in deeper waters (>50m) at a maximum distance of 50 km from shore with a LCoE* of:

- o less than 12 ct€/kWh by 2025, and to
- o less than 9 ct€/kWh by 2030

* the costs for delivering the electricity to onshore substations are taken into account within the LCoE
